

High performance starter batteries

Suitable for: DAF, Iveco, MAN, Mercedes-Benz, Neoplan, ...

Art. no.:
replaces Multibrand

www.dt-spareparts.com - Art. 9.67433 · 9.67435 · 9.67437

The high performance starter batteries from DT Spare Parts are universally usable and cover 95% of commercial vehicle applications. They always provide a cold test current of up to 1150 A/EN for the startup routine under all climatic conditions.

High performance starter batteries from DT Spare Parts in original equipment quality are distinguished by the following features:

- Latest calcium-calcium technology (CA/CA)
- Ready to be mounted, filled, charged and ready to start immediately
- Absolutely maintenance-free, no refilling of distilled water necessary
- Low self-discharge rate
- High vibration resistance and accident safety
- Durable, with 2 years warranty against defects in materials and manufacturing

Tips & Tricks

Before replacing a battery, an error diagnosis can indicate the cause of the failure. A defect on the vehicle is also possible. External loads are identified through a closed current test. The problem can already be solved by cleaning the battery pole mount and/or applying acid-free grease.

To obtain the full power, all batteries of a system should be replaced at the same time. It is important that the installed batteries have the same capacity. Please note: The protective cap from the positive pole should only be removed before connection. The positive pole is connected before the negative pole. Fasten the pole clamps securely. Removal is done in the reverse order. Always store batteries in a cool and dry place.

Construction of high performance starter batteries

1. Sturdy carrying handle
2. Connection pole (-)
3. Connection pole (+) with red pole cap
4. Battery batch number
5. Cover
6. Product label with hologram

DT Spare Parts

The brand DT Spare Parts from Germany provides a complete range of vehicle parts and accessories with a 24 month guarantee – no matter whether for trucks, trailers, buses, transporters or further applications, e.g. cars, agricultural vehicles, construction vehicles, marine or industrial applications. The guaranteed brand quality is achieved through the consistent product optimisation and relentless quality assurance within the framework of the Diesel Technic Quality System (DTQS).
