Mirrors

suitable for: DAF, Fiat, Ford, Iveco, MAN, Mercedes-Benz, Scania, Volvo, VW etc.

Quality for a crystal clear view

Mirror, mirror on the wall – who has the best spare parts in the whole country? Of course, DT Spare Parts! Because even the most robust mirror can get damaged during use. In such cases, DT Spare Parts offers the right solution for various applications.

The new PS Tips video with Parts Specialist Rolf provides practical insights into what is important when it comes to mirrors and their spare parts. More than 880 different items are available on the Diesel Technic Partner Portal – including articles suitable for DAF, Fiat, Ford, Iveco, MAN, Mercedes-Benz, Scania, Volvo and VW. This makes it quick and easy to find compatible spare parts for numerous applications. As well as complete mirrors, mirror arms, mirror glass and housings, cover caps and holders, adjustment motors and heating elements are also available.

Vehicle mirrors come in various designs: main mirrors, wide-angle mirrors and ramp mirrors. Depending on the application and the area of use, the mirrors have different mirror glass radii: "Main mirrors have a large radius and a smaller viewing window, while wide-angle mirrors have a smaller radius and a particularly large viewing area", explains Rolf. The radii of the glasses are checked by the DTQS (Diesel Technic Quality System) using a special radius gauge to ensure the highest quality and safety.

When it comes to installing mirror glasses, there are options like the plug-in type and the bayonet lock.

Many of the mirrors and mirror glass are "E-marked" and fulfil therefore the European requirements and safety standards.

If you have any technical questions about Diesel Technic products and services, the Parts Specialists can be contacted via their own HelpDesk and offer the right support: helpdesk.parts-specialists.com.
